

KRAS G12C — Probe Reference Cards

Bench-Ready SDA Probe Design · AXARA BioScience · April 2026

PRIMARY PROBE — CYS12	
Score / SASA	Composite: 10.05 SASA: 15.8 A2 3P confidence: 3.0 / 10
UniProt	Binding site Conservation: 0.0 Variant: in GASC; also found in lung carcinoma, pancreatic carcinoma and colon cancer; also found in metastatic colorectal cancer; somatic mutation; it is constitutively activated and stimulates transcription activation of tumor suppressor genes in non-transformed fibroblasts; promotes GTP binding; dbSNP:rs121913529
Warhead	SDA diazirine carbene insertion to CYS12 thiol (SG)
Conditions	UV 365 nm · 10 min · 4°C · PBS pH 7.4 · 10–50 µM probe
Evidence	VALIDATED — known covalent site
Confirm by	LC-MS/MS crosslink at tryptic peptide containing this residue

CANDIDATE #2 — LYS169	
Score / SASA	Composite: 8.34 SASA: 158.1 A2 3P confidence: 4.0 / 10
UniProt	Novel prediction Conservation: 1.0 Variant:
Warhead	SDA diazirine carbene insertion to LYS169 amine (NZ)
Conditions	UV 365 nm · 10 min · 4°C · PBS pH 7.4 · 10–50 µM probe
Evidence	NOVEL PREDICTION
Confirm by	LC-MS/MS crosslink at tryptic peptide containing this residue

CANDIDATE #3 — LYS104	
Score / SASA	Composite: 7.63 SASA: 67.4 A2 3P confidence: 4.0 / 10
UniProt	Novel prediction Conservation: 1.0 Variant:
Warhead	SDA diazirine carbene insertion to LYS104 amine (NZ)
Conditions	UV 365 nm · 10 min · 4°C · PBS pH 7.4 · 10–50 µM probe
Evidence	NOVEL PREDICTION
Confirm by	LC-MS/MS crosslink at tryptic peptide containing this residue
